The nation that builds the best people builds the future.
We stopped building them.

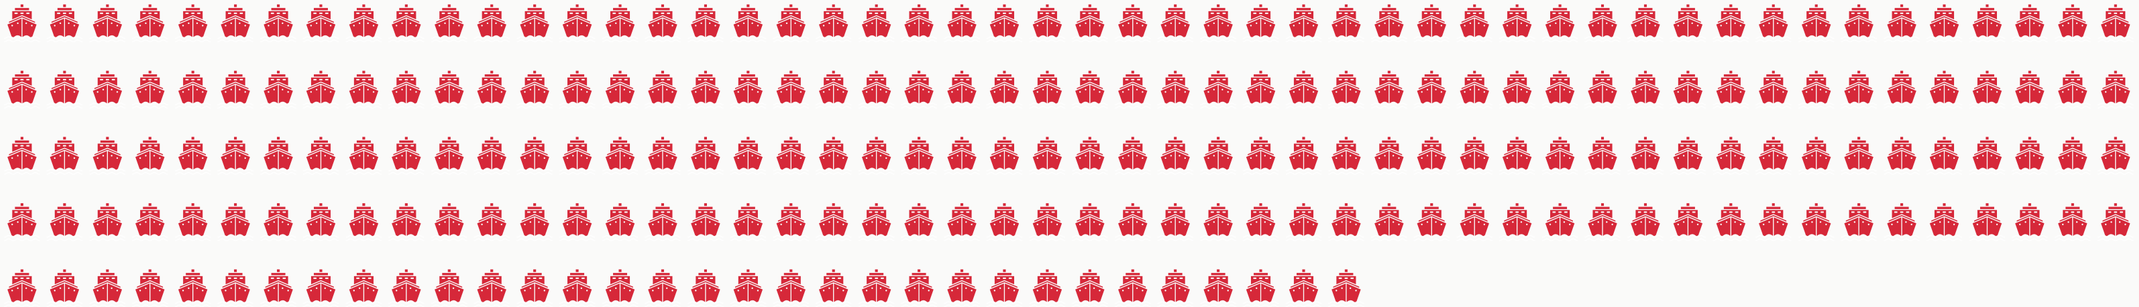
Project Arklight fixes that.

2

China redesigned their entire education system as a *strategic weapon.*

MILITARY SHIPBUILDING CAPACITY (2024)

CHINA: 232 VESSELS



USA: 1 VESSEL

In 2024, China produced over 230 military-capable vessels. The difference is not industrial capacity.
It is the workforce behind it.

3

Our institutions are paid to enroll students, *not to make them capable.*

43% of ACT test-takers met zero college readiness benchmarks

89% of companies are actively avoiding hiring recent graduates

45% of 12th graders scored below basic in math

75% of HR leaders say college is not preparing people for jobs at all

1 in 3 college students require remedial coursework before starting

4

The bill has come due. And *we cannot pay it with money.*

DEFENSE

7 years behind
Submarine programs behind schedule

14,000 +
Aircraft backlogged

232 : 1
China outproduces U.S. in shipbuilding

Critical
Weapon systems delayed by workforce shortages

INDUSTRY

2M+
Manufacturing roles unfilled today

3.8M
Projected unfilled by 2033

50%
Skilled workforce approaching retirement

201 : 1
Demand-to-supply imbalance in core trades

CAPITAL

$52B
CHIPS Act funding, workforce is the bottleneck

$369B
IRA spending constrained by labor availability

$200B+
Manufacturing construction with no one to staff it

$1.5T
Economic value immobilized by talent scarcity

"[United States would] run out of missiles in just *eight days* in a war against China for Taiwan."

PALMER LUCKEY, FOUNDER OF ANDURIL

We believe America's industrial future will be built by a *new kind of institution.*

Universities 4 Years	4 Years	Lecture Halls	Outdated Theory	No Benchmark	Graduate	Retrain on Job	6-18 Mo. Before Productive
Trade Schools 4 Years	5-12 months	Task Training	Machine Operation	No Academic Depth	Follows Instructions		
Arklight 1 Year	**1 Year**	**Real Production**	**Live Contracts**	**Arklight OS (Applied Math & Engineering)**	**Benchmarked Against Elite Talent**	**Understands the System**	**Mission-Ready**

Benchmarked against the best. Accelerated by AI. **Forged in real production.**

We identify the talent *everyone else misses.*

Our first product, Arklight Cognitive Index (ACI) identifies high-potential talent that traditional hiring overlooks.

Cognitive Capability

Predicts and measures whether someone can solve and master complex work, regardless of background or credentials.

Behavioral & Integrity

Analyzes and predicts an individual's decision-making under pressure, when conditions are hard, stakes are real, and no one is watching.

Technical Aptitude

Quantifies a candidate's ability for technical tasks and workflows, to operate in high-precision environments.

Built on...

80+ years of accumulated research

30+ academic and military studies

8

A factory that trains *while it produces.*

Our second product, to be launched, is the ***Talent Factory.*** Where real contracts build real operators

THE EXPERIENCE

What Happens Inside

Operators train inside live production from day one

Students fulfill real-world manufacturing contracts as they learn

Arklight OS delivers applied math and engineering in real time, in context, as the work demands

ACI tracks progress continuously against the elite benchmark

Every part produced is a lesson. Every contract fulfilled is a test.

THE RESULT

What Comes Out

Operators who understand the system, not just the task

Technical depth compressed from four years into one

Readiness quantified across cognitive, behavioral, and technical dimensions

Performance validated against the best operators in the industrial base

Productive and revenue-generating from day one

One system. No gaps. *Gets smarter every cycle.*

Assessment, training, production, and performance data in a single loop.

ASSESS

Measure What Resumes Can't

ACI quantifies cognitive capability, behavior, and technical aptitude against elite benchmarks before training begins.

TRAIN

Learn By Producing

Operators train inside live production, fulfilling real contracts while Arklight OS compresses applied math and engineering into the work.

DEPLOY

Mission-Ready From Day One

Operators whose readiness has been quantified across every dimension are placed with employer partners, productive immediately.

LEARN

The System Gets Smarter

Real-world performance data flows back, refining assessment accuracy, sharpening training, and raising the benchmark every cycle.

CORE

Compounding Advantage

Every force is converging on the same point. And the window *will not stay open.*

Assessment, training, production, and performance data in a single loop.

POLICY MANDATE

$52B CHIPS. $369B IRA. Historic defense spending.

DEMOGRAPHIC COLLAPSE

90% of the defense industrial base are SMBs approaching retirement

CONVERGENCE

Talent Infrastructure. Now.

GEOPOLITICAL URGENCY

China. Russia. Iran. Venezuela.

MARKET NEED

89% of employers avoiding recent graduates.

We're not guessing. *We're already in the room.*

Our **Traction.** For details about our partners and investment details, please reach out directly to ***dani@arklight.us***

[REDACTED]

- Weekly design mapping with talent leadership
- Curriculum co-development underway
- Willingness to co-design Talent Factory for all factories

[REDACTED]

- Chairman introduced Arklight to talent leaders
- Multiple buy-in across teams
- Corporate-level commitment, **[REDACTED]** project scope

[REDACTED]

- National program alignment, **[REDACTED]** program scope
- Designing program partnership
- Head of program wants Arklight as part of initiative

This is public-facing deck

If you'd like to know the terms of the investment, and the partnerships, please reach out to **dani@arklight.us**

Operators who've built before. Building again *for what matters most.*

A16Z CISCO APPLE U.S. ARMY AWS SAP EY VMWARE

Daniel Mota

CEO & FOUNDER

- Scaled AI Fintech startup to $250M, leading BD, Product, and Marketing.
- Venture at AWS, BD at SAP.
- Former university foundation board member.

Joshua Soto

FOUNDER

- Former CMO of A16Z
- Driving AI Communications and Marketing at Cisco
- Former Military Intelligence
- Revamped K-12 school to be AI-enabled.

Ray Bryant

FOUNDER

- Serial founder with successful exits.
- Professor at Jessup University and former board member of of Jessup Foundation.

We don't compete in one market. We capture *value from two.*

LAYER 1

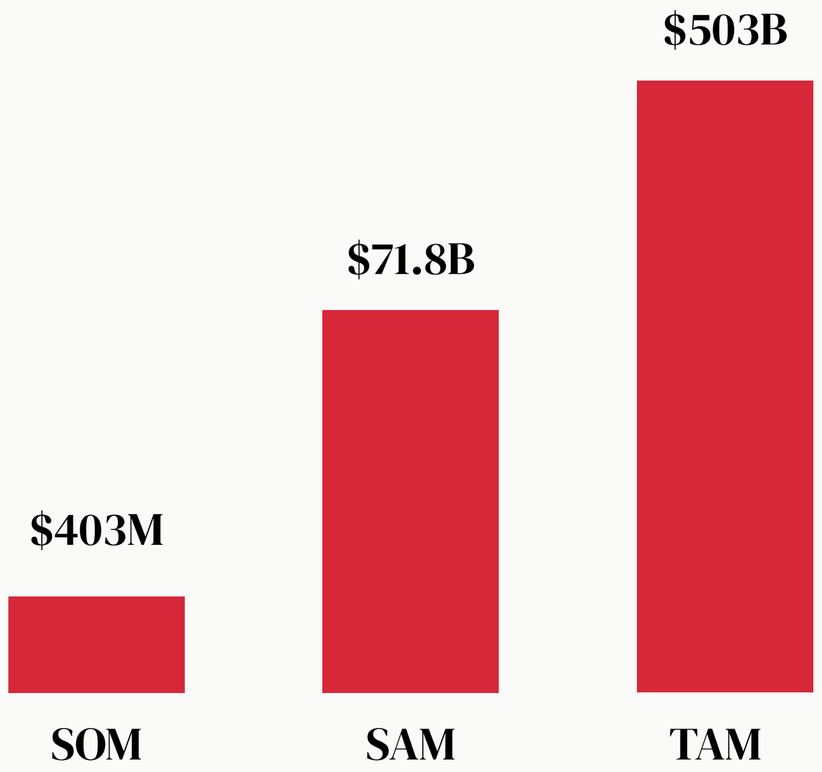
Talent Infrastructure

$100B+ in workforce spending is shifting away from traditional education, and no one owns the industrial talent layer.

LAYER 2

Manufacturing Ownership

90% of the defense industrial base is aging SMBs with no succession plan—creating a massive, overlooked acquisition opportunity.



Two revenue engines. *One compounding system.*

PRODUCT 1

ACI (SaaS)

High-margin recurring revenue replacing legacy hiring infrastructure.

Tiered revenue: [REDACTED] per year enterprise licenses.

Outcome upside: [REDACTED]

Locked demand: [REDACTED] provide predictable, high-margin cash flow.

PRODUCT 2

Talent Factory (Hybrid Industrial)

Self-funding infrastructure [REDACTED]

Contract fulfillment: Real manufacturing revenue generated during the training cycle.

[REDACTED] successful operator deployment [REDACTED]

Manufacturing upside: Acquired shops [REDACTED]

This is public-facing deck

If you'd like to know the terms of the investment, and the partnerships, please reach out to **dani@arklight.us**

[REDACTED] to prove *what we already know.*

Pre-seed round [REDACTED] post-money valuation.

USE OF FUNDS

Where the capital goes

Build and commercialize the ACI MVP.

Secure initial pilot deployments with defense manufacturers.

Expand industrial partnerships and advisory network.

Legal, compliance, and operational infrastructure.

WHAT THIS ROUND PROVES

Validation milestones

That ACI can identify industrial talent better than resumes and interviews.

That employers will pay for performance-based talent signals.

That the Talent Factory model has demand from real manufacturers.

That Arklight is the team and the system to solve this.

This is public-facing deck

If you'd like to know the terms of the investment, and the partnerships, please reach out to **dani@arklight.us**

PROJECT ARKLIGHT
